

WiFi

Employees should access this WiFi network:

Network Name: ECC Staff

Password:

Please don't give that password to anyone except other employees.

We also have a "guest network" for clients to use while in our waiting room, but that should only be given out on request (and only to clients). They should access this WiFi network:

Guest Network: Envision Counseling Clinic

Guest Password: faithhopelove

The reason there are two separate logins is because people on the guest network can't see the computers/devices of our therapists, plus they wouldn't be able to access our printers/scanners/etc.
